Index

Reactor Technology

Volume 15

The page range for each of the four issues of Vol. 15 is as follows:

No. 1, pages 1 to 86
No. 2, pages 87 to 184
No. 3, pages 185 to 242
No. 4, pages 243 to 340

Alloy 800
  low-cycle fatigue of, 188-94

Beryllium fluorides
  $BeF_2-LiF_2-ThF_4-UF_4$, development for MSBR fuels, 139-42
Bibliographies
  on civil, industrial and scientific uses of nuclear explosions, 85
  on effects of heated effluents, 240

Calvert Cliffs Decision
  impact on licensing procedures for nuclear power plants, 11
Cobalt-base alloys
  wear properties of, effects of liquid sodium on, 268-69
Computer programs
  discrete-ordinates, for numerical solution of the Boltzmann transport equation, 107-32
Copper-base alloys
  wear properties of, effects of liquid sodium on, 268-69

Earthquakes
  effects on nuclear power plants, simulation of strong motion, 239
Ecosystems
  radionuclide behavior in freshwater and terrestrial, symposium on, 340
European Nuclear Energy Agency
  symposium on management of radioactive wastes from fuel reprocessing, 84

Fission products
  behavior in MSBR, 142-43

Graphite
  radiation behavior in MSBR, 145-46

Hastelloy C
  wear and friction characteristics of, in liquid sodium, 9
Hastelloy N
  radiation behavior in MSBR, 144-45
Heated effluents
  effects of, bibliography on, 240
  release from once-through cooling systems, design and siting criteria for, 239-40

Inconel 718
  friction against 304 stainless steel, effects of sodium on, 269
  wear and friction characteristics of, in liquid sodium, 9
International Atomic Energy Agency
  symposium on environmental behavior of radionuclides released in the nuclear industry, 340
  symposium on management of radioactive wastes from fuel reprocessing, 84
  symposium on neutron monitoring for radiation-protection purposes, 135
  symposium on nuclear power plant control and instrumentation, 155

Literature
  list of recent or recently released, on reactor technology, 76-78, 184, 239 339-40
Lithium fluorides
  $BeF_2-LiF_2-ThF_4-UF_4$, development for MSBR fuels, 139-42
LT-2
  wear and friction characteristics of, in liquid sodium, 9

Metals
  book: Radiation-Induced Voids in Metals, 241
Molybdenum-base alloys
  wear properties of, effects of sodium on, 268-69

National Environmental Policy Act of 1969
  impact on licensing procedures for nuclear power plants, 11-13
Neutron cross sections, ENDF/B-2
  library of, for LMFBR program, adequacy of, 59-73
Neutrons
  Boltzmann transport equation for, discrete-ordinates methods for numerical solution of, 107-32
  flux synthesis methods in reactor physics, 210-34
  monitoring for radiation-protection purposes, symposium on, 135
Neutrons, fast
  effects on mechanical properties of LMFBR components, 264-68
Nickel-base alloys
  wear properties of, effects of liquid sodium on, 268-69
Nimonic 75
  friction against Stellite 6, effects of liquid sodium on, 269
Nuclear explosions
  book: Nuclear-Explosion Seismology, 86
  civil, industrial, and scientific uses for, bibliography on, 85

Plutonium nitrides
  PuN–UN, properties and potential of, for fast breeder reactor fuels, 87-101
Plutonium oxides
  PuO_2-UO_2, properties of, effects of oxygen concentration on, 303-35
Potassium alloys
  K–Na, book: Sodium Technology, 241
Publications
  (See Literature)

Radiation protection
  monitoring of neutrons for, symposium on, 135

This index was prepared by Theodore F. Davis of AEC's Technical Information Center, Oak Ridge, Tenn.

Radioactive wastes
management from fuel reprocessing, symposium on, 84
Radioisotopes
environmental behavior of, released from nuclear industry, symposium on, 340
Reactor coolants
development of MSBR, 143-44
effects of liquid sodium, on wear of reactor components, 1-10
Reactor fuels
development and testing of LMFBR, review of worldwide programs for, 16-55
development of mixed nitride, for LMFBR, 87-101
reprocessing of MSBR, 146-49
reprocessing of, symposium on management of radioactive wastes from, 84
Reactors
built, being built, or planned, compilation on, 85
physics calculations for, use of flux synthesis methods for, 210-34
Reactors (AI Demonstration LMFBR)
radioinduced swelling and creep of components of, fast neutron, 175-76
Reactors (BN-350)
radioinduced swelling and creep of components of, fast neutron, 172
Reactors (CE Demonstration LMFBR)
radioinduced swelling and creep of components of, fast neutron, 176-77
Reactors (Donald C. Cook)
containment system for, design and performance of ice-condenser, 184
Reactors (EBR-II)
radioinduced swelling and creep of components of, fast neutron, 168-69
Reactors (Enrico Fermi 1)
radioinduced swelling and creep of components of, fast neutron, 169-72
Reactors (FFTF)
accident, design flexibility for hypothetical core-disruptive, 239
core components of, effects of liquid sodium on wear of, 1-10
Reactors (FFTR)
radioinduced swelling and creep of components of, fast neutron, 174-75
Reactors (Gulf General Atomic)
radioinduced swelling and creep of components of, fast neutron, 177
Reactors (LMFBR)
components of, effects of fast neutrons on mechanical properties of stainless steel, 264-68
components of, effects of sodium on adhesion, friction, and wear of, 268-70
components of, effects of sodium on mechanical properties of stainless steel, 245-64
components of, effects of sodium on wear of, 1-10
components of, high-temperature structural design methods for, 239
design and performance of, effects of radioinduced swelling and creep of metal components on, 156-80
fuel development and testing programs for, review of worldwide, 16-55
mixed-oxide fuel for, effects of oxygen concentration on properties of, 303-35
mixed-nitride fuels for, properties and potential of, 87-101
nucleation of liquid sodium in, analytical models and experimental studies of heterogeneous and homogeneous, 278-300
reactivity calculations for, adequacy of ENDF/B-2 neutron cross-section library for, 59-73
Reactors (MSBR)
materials and systems development for, review on, 136-52
tritium production and distribution in, 79-84
Reactors (PFR)
radioinduced swelling and creep of components of, fast neutron, 172-73
Reactors (Phenix)
radioinduced swelling and creep of components of, fast neutron, 173-74
Reactors (power)
control and instrumentation for, symposium on, 155
earthquake effects on, simulation of strong motion, 239
fuel-cycle costs for, 184
licensing of, impact of Calvert Cliffs Decision on, 11
licensing of, impact of NEPA on, 11-13
structural materials for, low-cycle fatigue of Alloy 800, stainless steel 304, and stainless steel 316, 185-206
Reactors (pressurized-water)
thermal–hydraulic response to LOCA, comparison with LOAF experiments, 240
Reactors (SNR)
radioinduced swelling and creep of components of, fast neutron, 174
Reactors (Westinghouse Demonstration (LMFBR)
components of, radioinduced swelling and creep of stainless steel, 177-78

Seismology
book: Nuclear-Explosion Seismology, 86
Sodium
book: Sodium Technology, 241
effects of liquid, on friction and wear properties of reactor components, 1-10, 268-71
nucleation in LMFBRs, analytical models and experimental studies of heterogeneous and homogeneous, 278-300
Sodium alloys
K–Na, book: Sodium Technology, 241
Sodium fluorides
$NaBF_4$–NaF, development for MSBR coolant, 143-44
Sodium fluoroborates
$NaBF_4$–NaF, development for MSBR fuels, 143-44
Stainless steel
radioinduced swelling and creep of, fast neutron, 156-80
Stainless steel 304
friction against Inconel 718, effects of sodium on, 269
low-cycle fatigue of, 194-98
mechanical properties of, effects of liquid sodium on, 245-64
mechanical properties of, effects of fast neutrons on, 264-68
wear and friction characteristics of, in liquid sodium, 7
Stainless steel 304L
mechanical properties of, effects of fast neutrons on, 264-68
Stainless steel 316
low-cycle fatigue of, 198-206
mechanical properties of, effects of liquid sodium on, 245-64
wear and friction characteristics of, in liquid sodium, 8-9
mechanical properties of, effects of fast neutrons on, 264-68
Stainless steel 316L
mechanical properties of, effects of liquid sodium on, 245-64
Steels
wear propcoperties of precipitation hardened, effects of liquid sodium on, 268-69
Cr–Mo–steel, friction against itself, effects of sodium on, 270
steel–TiC, wear and friction characteristics of, in liquid sodium, 9
wear properties of tool, effects of liquid sodium on, 268-71
Stellite 1
friction and wear against various Stellites, effects of liquid sodium on, 270
Stellite 4
friction and wear against Stellite 1, effects of liquid sodium on, 270
Stellite 6
friction against Nimonic 75, effects of liquid sodium on, 269
friction and wear against Stellite 1, effects of liquid sodium on, 270
wear and friction characteristics of, in liquid sodium, 9
Stellites
friction against Stellites, effects of liquid sodium on, 269
Symposia
on environmental behavior of radio-

nuclides released in the nuclear industry, 340
on management of radioactive wastes from fuel reprocessing, 84
on neutron monitoring for radiation-protection purposes, 135
on nuclear power-plant control and instrumentation, 155

Thorium fluorides
$BeF_2-LiF_2-ThF_4-UF_4$, development for MSBR fuels, 139-42
Titanium carbides
friction against titanium carbide, effects of liquid sodium on, 269
steel–TiC, wear and friction characteristics of, in liquid sodium, 9
Transport equation
numerical solution of Boltzmann, discrete-ordinates methods for, 107-32
Tritium
control in MSBR, 143-44
production and distribution in molten-salt breeder reactors, 79-84
Tungsten carbides
friction against WC, effects of sodium on on, 269
Co–WC-base, friction against WC-base–Co alloy, effects of sodium on, 269
TZM molybdenum
wear and friction characteristics of, in liquid sodium. 9

Uranium fluorides
$BeF_2-LiF_2-ThF_4-UF_4$, development for MSBR fuels, 139-42
Uranium nitrides
properties and potential of, for space reactor fuels, 87-101
PuN–UN, properties and potential of, for fast breeder reactor fuels, 87-101
Uranium oxides
PuO_2-UO_2, properties of, effects of oxygen concentration on, 303-35
